NEW YORK, WEDNESDAY, MAY 2, 1894.

WORLD Over 3,000,000 Circulation of THE Week.

FOR TROLLEYS ALL OVER TOWN.

But the Metropolitan Traction Company Will Put the Wires Underground.

EXPERIMENTAL ROAD FIRST

Arrangements Under Way to Try the Scheme on the New Lenox Avenue Line.

SOMEWHAT LIKE THE CABLE.

If Everything Goes Well the Plan May Be Adopted on the Company's Entire System.

If the plans upon which the offices of the Metropolitan Traction Company are hard at work, can be successfully car-ried out, New Yorks will, in the near future, see the trolly in full operation in in this city. That much was admitted by the Company's President, Mr. Vreeland this morning to an "Evening

World" reporter. Lenox avenue, upon which the right to lay tracks was granted to the Com-pany by the Board of Iderman, is the place decided upon for the trolley experiment to be tried. For months the Company has been at work upon the scheme, but the affair was kept quiet after the Lenox avenue franchise had

Instead of the trolley wires being overhead, the Company intends having them laid underground. The connection, it is expected, will be somewhat after the fashion of the present cable ar-

The officials are aware of the strong opposition which the overhead wires would meet with. They also believe

that with the wires underground the danger to life would not only be les sened, but largely done away with. How far the Company has gone with say. He intimated pretty plainly, however, that the Lenox avenue ser-

e would be operated by no other

system than the trolley, and that if the experiment was satisfactory every road operated by the Company would be d with the underground trolley "We are not yet in a position to give out all our plans," Mr. Vreeland said. When we are the public will be taken been working on an underground trolley scheme for some months, but we have signed no contracts or agreements of any kind as yet. It may be some months before anything definite is accomplished. "Vast strides have been made in the field of electricity, and some time ago it was brought to our notice that the trolley wires instead of being strung coverhead could be placed under the road surface. That, in fact, they could be operated as safely as the cable is a treet, this city. Was picked up by a policeman of the road surface. That, in fact, they could be operated as safely as the cable is a treet, this city. Was picked up by a policeman of the trolley wires under the cable is a treet, this city. Was picked up by a policeman of the trolley wires the cable is a treet, this city. Was picked up by a policeman of the could be operated as safely as the cable is a treet, this city. Was picked up by a policeman of the trolley wires underground for the reason that there was no demand for it. Now it is different. Experiments have been and are now being made. We have no doubt whatever as to the result."

No it is first provided this morning, when Henry Young, twenty-one years old, of 457 Fultons, twenty-o into our confidence. It is true we have son, occurred this morning, when Henry

Neither Mr. Vreeland nor any of the other officers of the Traction Company

other officers of the Traction Company who were seen seemed to have the slightest doubt about being able to obtain the necessary consent of the Board of Aldermen to change the motive power of the roads. Some of the franchises granted are so loosely drawn that it is considered bossible to use the trolley system under them. It is stipulated in nearly all the franchises that no "overhead" trolley system should be used.

It is contended that if the wires are buried that difficulty will be completely overcome. "The World's" New Uptown Office.

"The World's" Uptown Office has moved into its new quarters at the junction of Broadway and Sixth avenue, at Thirty-second street. There are eight entrances, two on Broadway, two on Sixth avenue and four on Thirty-second
